

High Quality Hydroxyethyl Cellulose White powder hydroxyethyl cellulose hec

SPECIALIZED IN MANUFACTURING

Hydroxyethyl cellulose (HEC) is a non-ionic water-soluble polymer, therefore, it can act as a conditioner, bonding, dispersing, stabilizing, and can retain water, forming films and providing protective colloids.

Product Description

Item	HEC
Appearance	White or off white powder
Water content	≤5%
Purity	99.8%
PH	6-8
Viscosity(Brookfield RVT2%,20℃)	100cps-80000cps

PRODUCT DISPLAY

Welldone Hydroxyethyl Cellulose (HEC for short) .its a white or light yellow color powder or granule made by cellulose .hydroxyethyl cellulose powder is a non-ionic soluble cellulose ether .easily dispersed and dissolved in both hot and cold water .

hec cellulose get a good performance as thickener .Sizing agent. Oil-drilling additives. etc

you can find Welldone Hydroxy Ethyl Cellulose widely used in stone like paints, cosmetics, Oil drilling .Textile and food industry

Product Application

PRODUCT APPLICATION

HEC cellulose is mainly used as viscosities and fluid loss agent in oil drilling industry. High-viscosity HEC is mainly used as viscosities in well-completing or finishing fluid; while low-viscosity HEC is mainly used as fluid loss agent.

Paints & Coating Grade HEC, HEC cellulose provides excellent thickening efficiency, color development, open time, and superior resistance to biodegradation. It also plays a role in the emulsion, dispersion, stability and water retention. The coating has good rheological properties at different shear rates, and has good workability and leveling performance, good splash and sag resistance.

Company Information

COMPANY PROFILE

SHANDONG WELLDONE ENVIRONMENTAL NEW MATERIALS CO.,LTD. is a worldwide competitor specialized in cellulose ether production such as Hydroxypropyl methyl cellulose (HPMC), Hydroxyethyl cellulose (HEC), Sodium carboxymethylcellulose (CMC), Redispersible polymer powder (RDP) and Polyanionic cellulose (PAC) etc, more than 10 years' experiences in this field, with ISO, SGS, AHF, FDA certification and extreme standard let us keep very competitive in the current market, our annual production capacity is 20,000 metric tons.

FAQ

FAQ

-1- What kind of HEC can you produce?

-A- We could produce HEC for different application. Just tell us your requirements, we could offer you the most suitable products.

-2- What is your Minimum Order Quantity?

-A- Usually 1 MT, but for trial order, less quantity can be accepted. discount can be offered for the large order.

-3- Can you provide free samples?

-A- Free samples can be offered for your testing and checking, just feel free to contact us.

-4- What about the package?

-A- 25kgs per bag or 1000kgs per ton bag, private labeling and customized packaging is also available on request.

-5-Why choose us?

A:Supporting direct order, organic certification, pollution-free certification and other qualifications, strict quality inspection,safe and exquisite packaging/ Best quality, competitive price, ISO9001, HALA,enough stocks and strict quality control system.
